24-HOUR IMPACT-BASED FORECAST FOR GHANA

Weather Forecasting Risk Table			
Likelihood ↑	High (>60%)	G	H
	Medium (40% - 60%)	D	E
	Low (<40%)	A	B
		Low	Medium
		Impact →	

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	24	33
Forest	20	37
Transition	17	37
Northern	20	37

SUMMARY: Mist and fog patches will affect parts of the coastline, forest and high grounds early this morning, resulting in poorer visibility. As the day progresses, sunny conditions alongside dry and hazy weather of varying intensities will persist over most places within the country throughout the forecast period, with the possibility of some cloud developments over few places within the coastal and inland areas from afternoon into the evening hours. Visibility is expected to range between *300 meters and 9000 meters*.

NB: Cold weather is expected during the night and early morning hours over the northern and transition sectors

CAUTION!

- Motorist are advised to use fog lights and drive at safe speeds due to deteriorated visibility.
- The public, especially in the northern sector, is urged to handle naked fires with caution due to the dry conditions to prevent fire outbreaks.
