Coast	24	33
Forest	22	36
Transition	18	36
Northern	17	38

SUMMARY: Dry and hazy conditions of varying intensities will prevail across all sectors of the country throughout the forecast period with few clouds development along the coast. In the early hours of tomorrow, mist or fog patches will form over most parts of southern Ghana, thereby reducing visibility to between 300m and 8000m.

NB: Cold weather is expected during the night and early morning hours over the northern and transition sectors.

CAUTION: Due to the prevailing dry conditions, the public, especially in the northern sector, is strongly advised to handle naked flames with extreme caution to prevent fire outbreaks.
