Rain	Wind	Dust	Fog	Hail	Mist

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	24	33
Forest	23	36
Transition	18	37
Northern	17	38

SUMMARY: Tonight, slight haze of varying intensities will persist over southern Ghana with chances of thunderstorms or rain affecting few places within slightly north of the coastline and middle sectors. The northern and transition sectors will remain under dry and hazy conditions throughout the forecast period. Early tomorrow morning, mist or fog patches will form over the coastal, forest and mountainous zones with visibility ranging between 300m and 9000m.

NB: Cold weather is expected during the night and early morning hours over the northern and transition sectors.

CAUTION: Due to the prevailing dry conditions, the public, especially in the northern sector, is strongly advised to handle naked flames with extreme caution to prevent fire outbreaks.

SIGNED: Central Analysis and Forecasting Office (CAFO)
