## 18-HOUR INLAND WATER FORECAST FOR GHANA

VALID FROM 06:00 PM

**SUMMARY:** The lake and its surrounding area are expected to experience mostly cloudy conditions this evening, with a chance of isolated thunderstorms and light to moderate rain over the southern half. The northern sector is anticipated to remain relatively dry and slightly hazy throughout the forecast period. Visibility over the entire lake is, however, expected to reduce due to mist during the early hours of the morning.
