## 12-HOUR INLAND WATER FORECAST FOR GHANA VALID FROM 12 PM TODAY

**SUMMARY:** Periods of sunshine are expected over the lake area and nearby communities during the afternoon. However, from late afternoon into the evening, isolated light to moderate rain — occasionally accompanied by thunderstorms and strong winds — is likely to affect the southern and middle sections of the lake area. The northern sector, meanwhile, is expected to remain mostly dry, with slightly hazy conditions persisting throughout the forecast period.
