24-HOUR IMPACT-BASED FORECAST FOR GHANA

Weather Forecasting Risk Table			
Likelihood ↑	High (>60%)	G	H
	Medium (40% - 60%)	D	E
	Low (<40%)	A	B
		Low	Medium
		Impact →	

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	21	33
Forest	20	35
Transition	21	36
Northern	24	39

SUMMARY: Partly cloudy weather is expected for most parts of southern Ghana in the early hours of this morning amidst misty and foggy conditions over the coast, forest and mountainous regions. As the day progresses, periods of sunshine and cloudiness will prevail across the country with isolated cases of thunderstorms or rain likely over parts of the middle and transition sectors from late afternoon into the evening hours. The northern sector will remain fairly dry and slightly hazy throughout the forecast period.

NB: From this week, daytime temperatures will have a gradual increase across the country.

SIGNED: Central Analysis and Forecasting Office (CAFO)
