24-HOUR IMPACT-BASED FORECAST FOR GHANA

Weather Forecasting Risk Table			
Likelihood ↑	High (>60%)	G	H
	Medium (40% - 60%)	D	E
	Low (<40%)	A	B
		Low	Medium
		Impact →	

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	21	33
Forest	20	35
Transition	21	36
Northern	24	39

SUMMARY: Partly cloudy conditions are expected over most areas in the southern half of the country this morning. During the early hours, mist and fog patches are likely to develop over the coast, hilly grounds and forest zones. As the day progresses into the afternoon, bright and sunny weather will prevail over much of southern Ghana. However, from late afternoon into the evening, localised thunderstorms or rain are expected to affect some places in the middle and transition sectors of the country. The northern sector will experience dry and hazy weather of varying intensity throughout the forecast period.

NB: From this week, daytime temperatures will have a gradual increase across the country.

SIGNED: Central Analysis and Forecasting Office (CAFO)
