Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	23	32
Forest	23	35
Transition	21	37
Northern	24	39

SUMMARY: Mist or fog patches are expected to form over parts of the coast, forest, and hilly areas early this morning. As the day advances, sunny conditions will dominate the entire country with occasional cloudiness anticipated over southern Ghana. From late-mid afternoon into the evening hours, localised thunderstorms or rain are likely to affect a few areas along the coastline, its immediate inland areas, parts of the middle and transition sectors. Meanwhile, fairly dry and slightly hazy conditions will prevail across the northern half throughout the forecast duration.

SIGNED: Central Analysis and Forecasting Office (CAFO)
