Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	23	33
Forest	22	34
Transition	22	35
Northern	22	35

**SUMMARY:** Tonight, partly cloudy conditions will be experienced across most parts of southern Ghana amidst slightly hazy conditions over the middle belt. Few cases of localised rain are expected along the west coast. However, the dry and hazy conditions will be persistent over the transition belt and northern sector. Early morning mist or fog patches will form tomorrow along the coast and over the forested and mountainous areas. Visibility range throughout the forecast period is expected to be between 1km and 8Km

**CAUTION:** Due to the dry conditions, the public, especially in the transition belt and northern sector, is strongly advised to handle naked flames with extreme caution to prevent fire outbreaks
