Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	24	33
Forest	23	35
Transition	22	36
Northern	21	38

SUMMARY: Sunny conditions will prevail across southern Ghana this afternoon, with parts of the middle sector likely to experience fairly dry and slightly hazy conditions. However, from late afternoon into the evening hours, some localized showers are expected over a few coastal and nearby inland areas. Dry and hazy conditions of varying intensities will dominate the northern and transition sectors throughout the forecast period, with visibility ranging between 2000m and 9000m.

CAUTION: Due to the prevailing dry conditions, the public, especially in the northern sector, is strongly advised to handle naked flames with extreme caution to prevent fire outbreaks.
