Coast	24	33
Forest	23	36
Transition	22	36
Northern	20	38

SUMMARY: Early morning mist and fog patches are expected across most parts of southern Ghana, particularly over the coastal, forested and higher grounds. As the day progresses, sunny conditions will dominate with fairly dry and hazy weather affecting parts of the middle sector. However, there is a possibility of localized showers in a few areas from late afternoon into the evening. The northern and transition sectors will experience dry and hazy weather of varying intensity throughout the forecast period. visibility across the country is expected to range between *1000m and 8000m*.

CAUTION: Due to the dry conditions, the public, especially in the transition belt and northern sector, is strongly advised to handle naked flames with extreme caution to prevent fire outbreaks.
