Weather Icons

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	25	32
Forest	24	36
Transition	20	38
Northern	19	39

SUMMARY: Early morning mist and fog patches will form over parts of the coastal, forested and higher ground areas. As the day progresses, sunny conditions will dominate with fairly dry and hazy weather affecting parts of the middle and coastal sectors. Localised rainfall and thundery activities are also expected over few locales within the coastal and inland areas from late afternoon into the evening hours. The northern and transition sectors will experience dry and hazy weather of varying intensity throughout the forecast period with visibility across the country expected to range between *1000m and 9000m*.

CAUTION: Due to the dry conditions, the general public, especially in the transition belt and northern sector, is strongly advised to handle naked flames with extreme caution to prevent fire outbreaks.

SIGNED: Central Analysis and Forecasting Office (CAFO)
