

24-HOUR IMPACT-BASED FORECAST FOR GHANA

Weather Forecast Risk Matrix

Likelihood ↑	High (> 60%)	G	H	I
	Medium (40% – 60%)	D	E	F
	Low (< 40%)	A	B	C
		Low	Medium	High
		Impact →		

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	24	33
Forest	23	35
Transition	22	36
Northern	21	39

SUMMARY: Sunny weather is expected across the entire country this afternoon with cases of fairly dry and slightly hazy conditions over most places of southern Ghana. Few portions of the coast and its inland areas are likely to have some localised thunderstorm or rain late afternoon into the evening hours. The varying of dry and hazy weather will however persist for northern Ghana throughout the forecast period with visibility ranging from 3000m and 9000m.

CAUTION: Due to the prevailing dry conditions, the public, especially in the transition and northern sectors, is strongly advised to handle naked flames with extreme caution to prevent fire outbreaks.

SIGNED: Central Analysis and Forecasting Office (CAFO)
