

## INLAND WATER IMPACT-BASED FORECAST

### WEATHER SUMMARY

The lake and its nearby surroundings are anticipated to experience predominantly cloudy weather conditions throughout the forecast period. There is a 40-60% likelihood of isolated thunderstorms and intermittent rain of varying intensities, with strong winds expected over the middle and southern portions of the lake area from this evening into the early hours of the morning. However, the northern portion will remain dry, with hazy conditions from the start through to the end of the forecast.
