Rain	Wind	Dust	Fog	Hail	Mist

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	25	33
Forest	24	36
Transition	23	37
Northern	23	40

**SUMMARY:** The localised rainstorm indicated earlier in the weather update will continue to cast cloudiness and produce thunderstorms or rain of varying intensity over parts of the Volta, Eastern, Western north and Greater Accra regions this evening into the night. Meanwhile, the northern and transition sectors will experience dry and hazy weather throughout the forecast period. Mist or fog patches are likely to develop along the coast, forested and hilly areas of southern Ghana early tomorrow morning. Visibility across the country is expected to range between 2000 meters and 9000 meters.

**CAUTION:** Due to the dry conditions, the public, especially in the transition belt and northern sector, is strongly advised to handle naked flames with extreme caution to prevent fire outbreaks.
