<b>Forest</b>	<b>24</b>	<b>36</b>
<b>Transition</b>	<b>23</b>	<b>37</b>
<b>Northern</b>	<b>23</b>	<b>39</b>

**SUMMARY:** Sunny weather with periodic cloudiness will be seen over southern Ghana amidst slightly hazy conditions whereas, the transition through to the northern sector experiences varying intensities of dry and hazy weather conditions. Visibility is anticipated to be fairly poor (4km to 8km) due to the suspension of dust particles in the atmosphere. However, there is the likelihood of **localised thunderstorms** or rain to affect parts of the coast and the forest belt (*Assin Fosu, Brehman Asikuma, Huni Valley, Adukrom, Mampong, Aburi, Kibi, Ave Dakpa, Somanya, Dodowa and environs*) from late afternoon into the evening.

**CAUTION:** Due to the prevailing dry conditions, the public, especially in the transition and northern sectors, is strongly advised to handle naked flames with extreme caution to prevent fire outbreaks.
