Rain	Wind	Dust	Fog	Hail	Mist

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	25	33
Forest	24	36
Transition	23	37
Northern	23	39

**SUMMARY:** Tonight, mostly cloudy weather is anticipated to be prevalent over southern Ghana with localised cases of thunderstorms or rain over portions of the coast and the middle sector. The northern half of the country will remain in dry and hazy weather conditions of varying intensities throughout the forecast period. In the early hours of tomorrow, misty or foggy conditions will reduce visibility over forest and hilly areas therefore motorists are advised to take precautionary measures.

**CAUTION:** Due to the dry conditions, the public, especially in the transition belt and northern sector, is strongly advised to handle naked flames with extreme caution to prevent fire outbreaks.
