**SUMMARY:** Early this morning, mist or fog patches will develop within the coastal, forested and hilly areas, resulting in reduced visibility. Thereafter, sunny conditions with periodic cloudiness will be observed across southern Ghana during the afternoon hours. Towards late afternoon and into the evening, thunderstorms or rain may occur over parts of the middle sector and some inland coastal areas. Meanwhile, fairly dry and hazy conditions will dominate the northern sector and parts of the transition zone throughout the forecast period. Nationwide visibility is expected to range between *3000 meters* and *9000 meters*.
