Northern	25	39

SUMMARY: The moderate rainstorm with its bulk in the gulf referenced in the weather update early on, is continuing its steady westwards movement and it's expected to increase cloud cover while producing thunderstorms with or without rain along the coast and its inland areas. This storm may trigger localised activities as well for areas in the middle and transition belt during the afternoon and evening hours.

CAUTION!

Strong winds may precede the movements of the storm, the Public, is hereby advised to take precautionary measures and keep safe.
