

24-HOUR IMPACT-BASED FORECAST FOR GHANA

Weather Forecast Risk Matrix

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	25	34
Forest	23	34
Transition	23	36
Northern	25	40

SUMMARY: The coastal sector as well as a few inland areas of the coast and parts of the middle sector will experience an alternation between sun and clouds this afternoon. From mid-afternoon into the night, cases of thunderstorms or rain are expected to affect some places over the aforementioned sectors. The afternoon over the northern half will be very bright and sunny resulting in high temperatures and discomfort. From afternoon into the night, partly cloudy to few clouds will be experienced over most parts of the northern half.
