Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	25	34
Forest	23	35
Transition	22	38
Northern	25	41

SUMMARY: Early this morning, mist or fog patches are likely to form within the coastal, forest, and hilly areas of southern Ghana. Thereafter, most parts of the country will experience bright and sunny conditions. However, localised rain and thunderstorms may develop over a few coastal and inland areas later in the afternoon into the evening. Meanwhile, the northern sector will remain generally hot and sunny, with slightly hazy conditions prevailing over the upper regions.

NB: A rise in temperatures is anticipated across most areas, especially within the northern sector.
