Coast	25	34
Forest	23	35
Transition	23	38
Northern	25	41

SUMMARY: Generally, misty conditions are anticipated to form over hilly and forest areas in the early hours of the morning to reduce visibility. However, as the day progresses, bright, fair and sunny weather conditions will dominate most parts of the country from mid-morning into the afternoon hours resulting in hot temperatures with varying intensities across all sectors. Few cases of localised thundery showers are expected to affect places in the inland areas of the coast into the forest and transition belts from late afternoon into the evening.
