Northern	26	42

SUMMARY: Scattered cases of thunderstorms or rain currently affecting the *eastern portions* of the middle, transition and northern sectors are expected to spread and induce cloudy conditions amidst rainfall and thundery activities over more areas this evening into the night hours. The extreme upper regions of northern Ghana will have slightly hazy conditions persisting throughout the forecast period. Early tomorrow morning, mist or fog patches are likely to form within the forest, coastal and hilly areas.
