Description:

A moderate rainstorm is observed over the coast of Togo into Ghana. This storm is expected to move westwards to produce rain of varying intensity within the Volta, Greater Accra and Eastern regions.

Instruction:

Stay sheltered to protect yourself from rain, thunder, and strong winds. Stay away from low-lying areas, and other flood-prone regions. Flash flooding can occur quickly. If you must travel, drive with caution. Roads may be slippery, and visibility can be reduced due to heavy rain. Avoid driving through flooded areas
